It is used by designers and engineers in the automotive, aerospace, electrical/electronic engineering fields as well as others. The Bentley MicroStation comes with a variety of pre-built components that are compatible with Microsoft Windows 7 or higher operating systems that are installed on computers made after 2005 or PCs running Microsoft Office 2010 or higher versions that have been installed for use with this application. Bentley MicroStation for Windows is software that connects the designer with the Bentley tools that are used for designing, visualization and data management. It helps with task planning, product development, project management and visualization by varying degrees. The software allows users to connect with Bentley tools like Intergraph SmartPlant 3D (plant design), Intergraph SmartSketch (automotive design), Intergraph CAPE/CAST (construction design) and Bentley Navigator (data management). The libraries in the Bentley MicroStation for Windows consist of prebuilt components that are compatible with the operating systems used on computers made after 2005. These libraries are made up of components like Bentley Building, Bentley Site Modeler, Bentley Structural Modeler and Bentley Electrical Manager. The software also has 2D drafting capability with high accuracy. The drawings can be used in CAD (computer aided design) applications like AutoCAD, Auto CAD LT and MicroStation. The drawings can be fully customized for each project using the application interface's tools like filters and layers. Bentley MicroStation software allows users to connect with other programs like Microsoft Excel, Microsoft Project or Microsoft Visio to manage schedules, tasks and diagrams to help control projects. The Bentley MicroStation software was developed by Bentley Systems Corporation from 1991 to 2002. The software has been replaced by Bentley Navigator for Windows for engineering design, DraftSight PRO for engineering design, and Mechanical Desktop for mechanical engineering. Bentley System LLC carries on the development of the software after going through a complete revamp in 2015. The new version of the software is a web-based version that supports mobile devices and PCs with the latest operating systems that work on computers made after 2005 or PC running Windows 10 or higher versions of windows installed on computers.
